Specialists in the manufacture and maintenance of premium quality production tooling in the uk.

Specialists in the manufacture and maintenance of premium quality Production tooling, C&M Mould Tools is a highly respected player in the engineering industry by both its peers and its extensive customer base.

We are a small but dynamic company

We are a small but dynamic company, which enables us to provide the personal attention and commitment to all stages of design, production and post delivery service that our customers demand.

Our proactive and innovative approach to meeting these exacting standards means that we do not encounter problems – only solutions.

The range of our plant, equipment & design tools not only allows us to meet our primary Production tooling demands, but also to cater for prototype tooling, undertake general engineering projects and to offer sub contract facilities.

With our major clients heralding from the Automotive and Medical sectors, our portfolio includes such diverse industries from Household Goods to Market Gardening.

Diverse clients and sectors

As well as designing and manufacturing high quality mould tools we also undertake the following activities:-

- Modifications to existing tooling
- Repairs
- Servicing
- Sub-contract CNC milling, wire erosion, jig grinding
- Prototype tooling
- Support for overseas tooling

We have a wide and varied customer base comprising of local, national & inter-national clients. Whilst a great deal of our work stems from repeat business we are always looking for new customers that we think we could provide a quality service to.
